Work experience

belongOnline

August 2012 — Present

Web Designer

I've been freelance web developing for the past 6 years and have become experienced in the field. I have learnt many different web technologies and languages, focusing mainly on front-end design, but also branching to back-end aspects. This has also given me the opportunity to manage customers requirements and relations independently, at the same time as developing my own skills independently.

You can view my online portfolio with this link: <http://l96.nl/>

The Retail Data Partnership

December 2013 — December 2014

Technical Support

I worked for the Retail Data Partnership for a year. The Retail Data Partnership is a leading software development company, selling advanced EPOS systems to independent retailers. From my experience with the company, not only did I expand my existing computing knowledge with Linux operating systems and MySQL databases, I had also learnt to work together as a strong team, dealing with hundreds of clients a day in a fast paced customer support environment.

My duties were to provide superior customer support over phone, resolving the issues efficiently, politely and effectively. What I enjoyed most about my experience with the role was the satisfaction received after resolving complicated issue for a customer.

Skills

Languages and libraries I have an advanced understanding include:

HTML(5), CSS(3), PHP, SQL, Visual Basic

Languages and libraries I have a good understanding include:

Java, JavaScript, jQuery, Snap.svg

Languages and libraries I have a beginner understanding include:

AngularJS, XML

As well as being a polyglot in programming languages, I am also experienced with industry tools. These range from the Adobe Suite to different frameworks such as bootstrap, or content management systems like WordPress. Recently I have taken a practical interest in AngularJS and look forward to building some intuitive web applications for my next project.

Qualifications

I studied GCSEs at Bourne Grammar School in Lincolnshire, UK. These are the results that I obtained:

Maths - **A***
Chemistry - **A***
Biology - **A***
Physics - **A**
English Literature - **A**
English Language - **A**
Religious Education - **A**
Product Design - **A**

I then followed on at Bourne Grammar School to study A-Levels. I studied A-Level computing during my GCSEs, a year early.

A- Level Computing - **A**

After this I moved to Utrecht and completed VWOs at Boswell Beta.

VWO Wiskunde B (Mathematics B) - **7**
VWO Natuurkunde (Physics) - **6**

Interests

I have many different interests but most lie around technology and media.

- Computing - I love web development, finding efficient solutions and algorithms to problems.
- Car Mechanics - Also a big passion. I enjoy tinkering with my classic car. Like computing, this focuses on identifying a problem and creating an appropriate solution.
- Music/Media - I am a self confessed audiophile. I enjoy going to different musical events, normally on my own and meeting new people.
- Kayaking & Hiking - I also love the outdoors, saving throughout the year to hopefully go on holiday somewhere with more mountains than Netherlands!
